

SOUTH EAST QUEENSLAND

Commercial Communications Infrastructure Specialists

Delivering structured cabling, fibre optics, CCTV, access control, enterprise WiFi and audio visual solutions across South East Queensland.

SOUTHCOMM is an owner-operated commercial communications contractor delivering structured cabling, fibre optics, CCTV, access control, enterprise WiFi and audio visual solutions across South East Queensland.

We work alongside builders, electrical contractors, facility managers, developers and business owners to deliver reliable, standards-compliant communications infrastructure for projects of all sizes.

OUR SOLUTIONS

What we deliver

Structured Cabling

Certified Cat6 and Cat6A structured cabling delivering reliable, scalable network infrastructure with comprehensive testing and documentation.

Fibre Optics

Fusion splicing, OTDR testing, certification and backbone fibre infrastructure for commercial and industrial environments.

CCTV & Security

Commercial surveillance systems designed to improve security, visibility and operational awareness.

Access Control

Secure electronic access solutions including intercoms, controllers, mobile credentials and visitor management.

Commercial WiFi

Enterprise wireless networks designed for reliable performance, seamless coverage and future expansion.

Audio Visual

Professional meeting room, presentation and background audio solutions for modern workplaces.

Business Communications

Internet, voice and integrated communications tailored for commercial environments.

WHY SOUTHCOMM

Built on accountability and quality

● Owner Operated

Deal directly with the owner from quotation through to project completion. Every project is personally managed to ensure clear communication, accountability and consistent quality.

● Commercial Experience

Extensive experience delivering communications infrastructure across offices, retail, warehouses, hospitality, healthcare and critical infrastructure projects.

● Quality Workmanship

Every installation is completed neatly, labelled, tested and documented in accordance with Australian Standards.

● One Contractor

One point of contact for structured cabling, fibre, CCTV, access control, WiFi and audio visual systems.

OUR PROCESS

How we deliver

01**Consultation**

Site inspection, project review and scope assessment.

02**Proposal**

Clear quotations, equipment recommendations and project planning.

03**Installation**

Professional installation completed safely, efficiently and in coordination with other trades.

04**Testing & Certification**

Comprehensive testing, certification and documentation provided at project completion.

05**Handover & Support**

Client handover, warranties and ongoing support for future upgrades and maintenance.
